## FEATURES

The module is light, thin, soft and flexible

Using high-quality lamp beads, high brightness, energy saving and environmental protection, stable performance

High-performance IC driver chip with stable quality and long service life

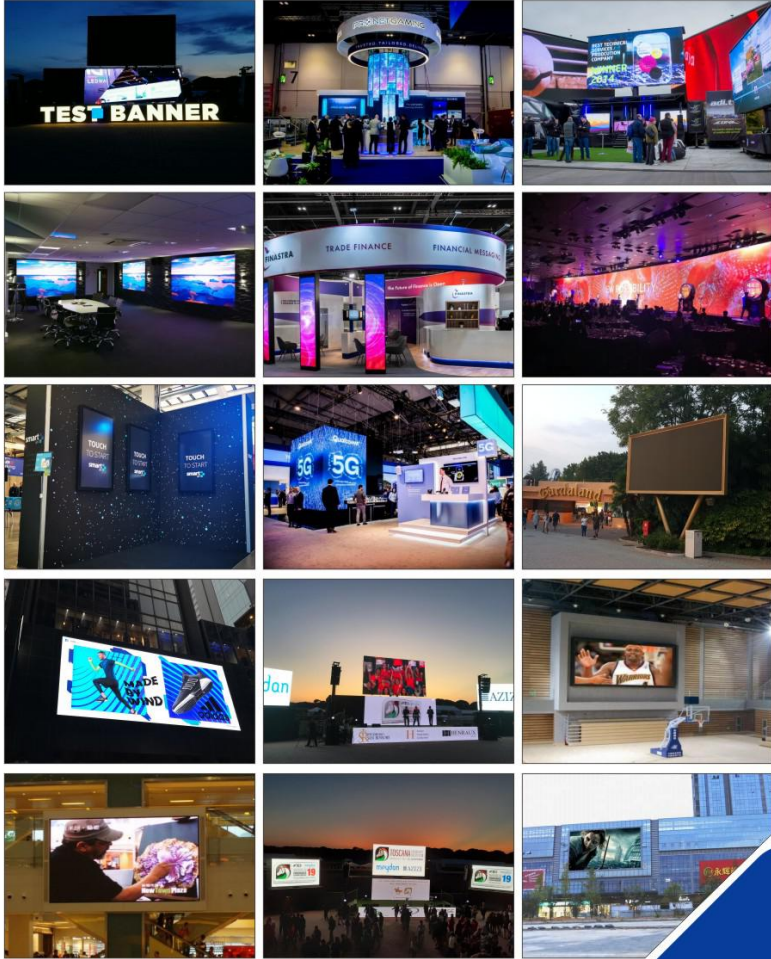

- 01 Soft rubber base and PCB, making really soft LED modules.
- 02 Easy to make creative shapes, inner arc, outer arc, cylindrical and others one can imagine.
- 03 Magnetic front service, quick installation and maintenance.
- 04 Strong magnets, modules are never loose and never fall.
- 05 High compatibility, can work with almost all control system.
- 06 High cost-effective, can build creative LED displays with affordable cost.
