

Relaying card

CN901

V2.0

Sep 2020

1. Features

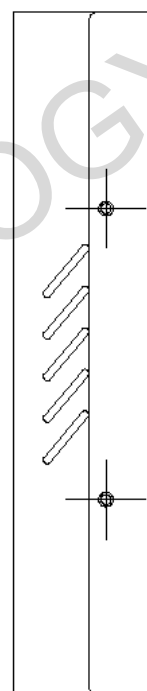

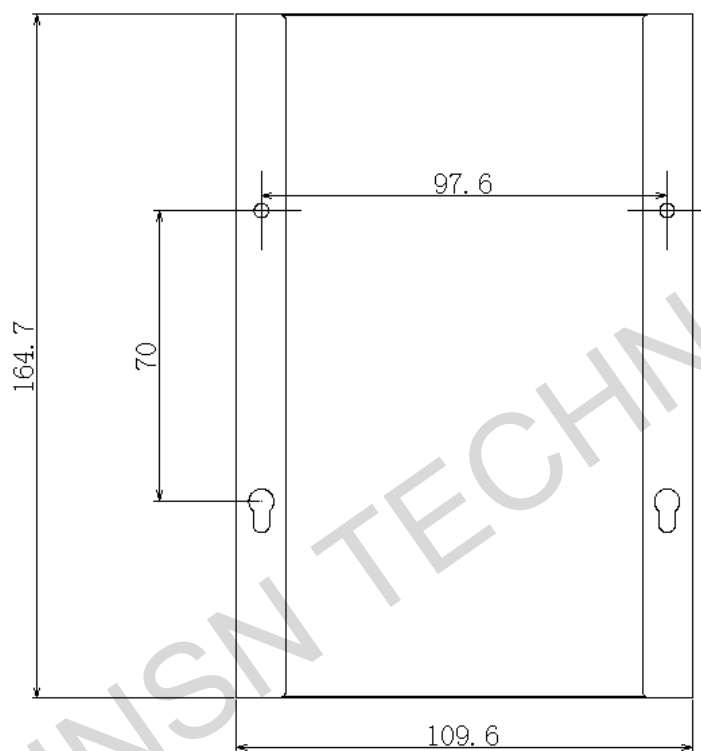

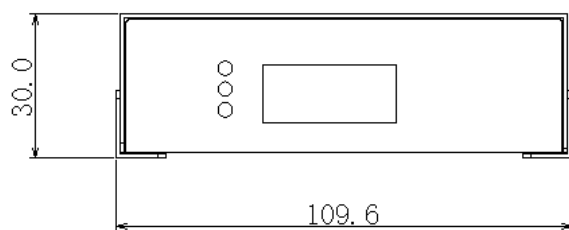

Connector: RJ45

Supply voltage: +110-220V, 50/60HZ (electric transformer is embedded)

Indicator status: The No.1 and No.2 LED indicates the status of signal input/output; the No.3 is for power.

Usage: To extend the signal transmission distance between sending and receiving card. Usually one relaying card can extend 100M.

2. Dimensions
